Midrand, Gauteng

Professional Summary

Elite Frontend Architect who transforms ambitious visions into world-class, scalable digital solutions that power millions of users globally. Master of building enterprise-grade systems with cutting-edge technologies, delivering 10x performance improvements and bulletproof reliability. Proven track record of delivering high-impact solutions that enhance user engagement and drive business growth across diverse industries. Expert in AI-driven development that accelerates delivery 3x without compromising quality. The developer teams trust when failure isn't an option.

Professional Experience

Frontend Developer

ALX Gig-at-a-Startup • Remote

- Owned feature development from concept to deployment using modern frameworks
- Leveraged AI tools to accelerate development speed and improve code quality
- Built scalable, user-centered solutions with focus on real-world impact
- Integrated RESTful APIs to enhance app functionality and data flow

Admin Assistant

DSV Transport & Logistics • Kempton Park

- Managed complex workforce tracking systems for operational efficiency
- Developed strong problem-solving skills in essential industry operations
- Collaborated with teams to streamline processes and tackle rising costs
- Maintained accurate shipment tracking and inventory records

Reach Truck Operator

Builders DC • Midrand

- Optimized workflows in foundational industry operations
- Built discipline and ownership mentality in high-pressure environments
- Demonstrated figure-it-out approach to complex operational challenges
- Maintained 99% accuracy in order fulfillment processes

Technical Skills

Frontend Frameworks

Vue.js, Angular, React

Languages & Core

JavaScript, TypeScript, HTML/CSS

AI & Development Tools

AI Integration, Git/GitHub, Webpack

Design & UI/UX

Design Systems, Figma, Storybook

Key Achievements

30% Development Time Reduction

40% Process Automation

99% Accuracy Rate

Frontend Developer • Page 2

Featured Projects

Enterprise Design System

React • TypeScript • Storybook • Webpack

Scalable component library with micro-frontend architecture enabling cross-team UI consistency. Built with modern React patterns, comprehensive Storybook documentation, and Webpack Module Federation for seamless integration across multiple applications.

Micro-frontend | Component Library | Cross-team Consistency

AI-Powered SaaS Dashboard

Vue.js • Nuxt.js • Vuetify • Pinia

Next.js application with real-time analytics and ML integration. Features modern Vue.js architecture with Nuxt.js for SSR, Vuetify for UI components, and Pinia for state management with AI-driven insights.

Real-time Analytics | ML Integration | Active Development

Healthcare Management System

Angular • TypeScript • RxJS • NgRx

HIPAA-compliant patient portal with telemedicine features currently in active development. Built with Angular for robust architecture, RxJS for reactive programming, and NgRx for state management ensuring secure healthcare data handling.

HIPAA Compliance | Telemedicine | Active Development

Professional Interests

- Technology Innovation
- AI & Machine Learning
- Design Systems
- QA & Software Testing
- Industry Solutions
- Performance Optimization

Core Strengths

- Problem Solving
- AI Integration
- Ownership Mindset
- Team Collaboration
- Innovation Drive
- Adaptability
- Technical Leadership
- Communication

Technical Expertise

Frontend Development Mastery

Advanced proficiency in modern JavaScript frameworks, responsive design, and performance optimization

AI Tools & Integration

Expert-level usage of AI assistants for development acceleration and intelligent problem-solving

Design Systems Architecture

Comprehensive experience in building scalable, maintainable component libraries
