Professional Summary

Frontend Developer transitioning from logistics operations with a proven track record of 99% accuracy and process excellence at DSV Transport & Logistics. Proficient in JavaScript, React, Vue.js, and Angular through intensive ALX Africa software engineering training. Combines technical skills with real-world operational experience to build reliable, user-focused applications that solve business problems. Demonstrated ability to automate processes (40% efficiency gain), master new technologies rapidly, and deliver results in high-pressure environments. Seeking to leverage unique blend of technical expertise and operational discipline in a frontend development role.

Professional Experience

Frontend Developer

ALX Gig-at-a-Startup Program • Remote

- Developed responsive web features using React, Vue.js, and Angular, reducing development time by 30% through AI-assisted coding tools
- Built and deployed production-ready features with focus on performance and accessibility
- Integrated RESTful APIs and managed state with modern patterns (Redux, Vuex, NgRx)
- Collaborated in agile environment, participating in code reviews and implementing feedback to improve code quality

Admin Clerk

DSV Transport & Logistics • Kempton Park

- Managed workforce tracking systems and shipment documentation, maintaining 99.5% data accuracy
- Automated 40% of manual reporting processes using Excel macros, saving 10+ hours weekly
- Collaborated with cross-functional teams to identify and resolve operational bottlenecks, reducing processing delays by 25%
- Maintained accurate inventory records and shipment tracking across multiple systems

Reach Truck Operator

Builders DC • Midrand

- Achieved 99% accuracy rate in order fulfillment and inventory putaways in high-volume warehouse environment
- Consistently exceeded daily productivity targets, contributing to 15% improvement in overall team efficiency
- Maintained perfect safety record while operating heavy machinery in fast-paced setting

Technical Skills

Frontend Frameworks

Vue.js | Angular | React | Nuxt.js

Languages & Core

JavaScript | TypeScript | HTML/CSS

Testing & Quality

Jest | Unit Testing | Test Automation

DevOps & Tools

Git/GitHub | CI/CD | Webpack

Design & UX

Figma | Storybook | Responsive Design

Key Achievements

30% Faster Development (AI Tools)

40% Process Automation (DSV)

99% Fulfillment Accuracy

Education & Certifications

Software Engineering
ALX Africa

Frontend Specialization - Advanced

Professional Foundations
ALX Africa

Leadership & Communication Excellence

Frontend Developer • Page 2

Featured Projects

Enterprise Design System

React • TypeScript • Storybook • Webpack

Scalable component library with micro-frontend architecture enabling cross-team UI consistency. Built with modern React patterns, comprehensive Storybook documentation, and Webpack Module Federation for seamless integration.

Micro-frontend | Component Library | Storybook Docs

AI-Powered SaaS Dashboard

Vue.js • Nuxt.js • Vuetify • Pinia

Next.js application with real-time analytics and ML integration. Features modern Vue.js architecture with Nuxt.js for SSR, Vuetify for Material Design UI, and Pinia for centralized state management.

Real-time Analytics | ML Integration | SSR with Nuxt

Healthcare Management System

Angular • TypeScript • RxJS • NgRx

HIPAA-compliant patient portal with telemedicine features. Built with Angular for robust architecture, RxJS for reactive programming, and NgRx for state management ensuring secure healthcare data handling.

HIPAA Compliance | Telemedicine | Secure Auth

Professional Interests

- Technology Innovation
- AI & Machine Learning
- Design Systems
- QA & Software Testing
- Industry Solutions
- Performance Optimization

Core Strengths

- Problem Solving
- Process Optimization
- Ownership Mindset
- Team Collaboration
- Rapid Learning
- Adaptability
- Attention to Detail
- Communication

Technical Expertise

Frontend Development

Advanced proficiency in modern JavaScript frameworks, responsive design, and performance optimization

AI-Assisted Development

Proficient usage of AI tools for development acceleration and intelligent problem-solving

Component Architecture

Experience building scalable, maintainable component libraries and design systems
